

VEGAN CATERING

All catering organized or requested by ourselves for LCE produced projects is vegan. On commercial jobs we ask for vegan catering for LCE and enquire with clients if a vegetarian/vegan and plastic free catering for all members is possible.

FUR FREE

We do not support the use of fur and will refrain from collaborating on projects where fur is present.

GREEN COMMUTE

Our daily commute to work is done on foot, by bike or public transport.

TRAVEL

Within Europe we try and use trains as much as possible. We fly economy and limit long haul overseas return flights to a maximum of 5 per annum.

BIKE COURIERS

We exclusively use bike couriers unless the load requires a motor driven vehicle.

STUDIO: PAPERLESS & PLASTIC FREE

We only use paper via outside providers for printing artwork and proofing. All published books from 2018 are printed on 100% recycled paper stock. We do not buy plastic bottles at the studio and instead use a filtration system for tap water.

PLASTIC REDUCED PRODUCTION

We bring along refillable waterbottles and keep cups and ask other team members to do the same where possible.

CLOUD BACK UP

We have switched over to cloud back up for our internal archive, reducing the waste created by physical storage media.

FILM

Although we use analogue materials, for projects where film is not a must or has too high of a shot count i.e. for lookbooks, we will choose digital methods instead.

SUPPORT

We support brands that are vegan, sustainable and/ or committed to positive change. We create content and advertise for charities at no cost.

INSPIRE

Within the all personal projects undertaken by LCE we focus on themes centered around our environment, nature, the future of our cities, etc to continue these vital conversations. We further use social media as a platform to spread these values.

ACTIVE PROTEST

We support environmental and animal charities in a multitude of ways, including fostering programs, taking part in local environmental group meetings, vegan charity dinners, as well as going to organized protests held in London.

We are constantly looking to improve our working practice and will be adding further solutions as time goes on.
